—The method of operation of the stock shares is somewhat as follows: A good talker goes to a farmer whose stock is doing well, and takes special pains to ascertain, and find out, to sell him from ten to fifty bushels of Bohemian oats at \$10 per bushel.

The worthy granger, to whom a dollar looks as big as a bushel, and who is anxious to get rid of his stock, says he could never pay such a price; that he has not that much money.

"But wait a minute," says the schemer, "You don't have to pay me a single cent down. You only have to give me your note for \$200. On the same day you will pay for your stock, and give you a good bond holding us to our agreement. The bond will not be presented until the bond is paid."

This opportunity to make a hundred dollars or more out of nothing, is a temptation which the sucker, and he readily signs the blank note which is presented. The note is then cashed, and the sucker is left with a note for \$200, and a good bond holding us to our agreement. The bond will not be presented until the bond is paid.

The bonds given to the farmers are numbered. The agent retains a stub, which he carries with him. These stubs are numbered, and the agent retains a stub, which he carries with him. These stubs are numbered, and the agent retains a stub, which he carries with him.
